1. It was determined that the projected underground bunker installation in Kablow which has a 25,000 cubic meter volumetric capacity is to be enlarged by a leading plant in which to store unloaded carrier fuel. The leading plant is to take place at the summit of the Peak. It has not been determined who will carry out the designing of the leading plant. The final date for the completion of the installation will therefore be post-poned, although the State Secretariat for State Reserves is urging a speedy completion.
2. The pumping station of the underground bunker installation is allegedly designed so that the bunkers can be filled to one hundred percent. The pipe lines were to be laid in such a way that the containers could be controlled by a suitable piping system.
3. Both the ~~unusual~~ type of bensin) and DK (Diesel fuel) are to be stored. Provision for the cleaning of the containers and pipes will be made in such a way that the containers and pipes which DK was stored
